

ABHISHEK SUTHAR

Ahmedabad, Gujarat, India • +91 7600295175 • ak15suthar@gmail.com • [Linkedin](#)

SKILLS

- **Programming Languages:** HTML, JavaScript, CSS, TypeScript
 - **Databases:** MySQL, PostgreSQL, MongoDB, Cassandra
 - **Frameworks:** Angular, React, Express.js
 - **Tools and Technologies:** Git, Node.js, Visual Studio Code, Swagger, Jenkins, Postman, MUI, Microfrontend, Custom UI Library, Monorepo, Twilio, Nodemailer, Agentic AI
-

WORK EXPERIENCE

SDE 2 - Taqtics

Sept 2025 - Present

- Developed a real-time chat module using Twilio, enabling seamless communication and instant message delivery across the platform.
- Designed and implemented a configurable Email Template Builder, allowing users to create, customize, and manage dynamic email templates without developer intervention.
- Led the migration of legacy APIs to the V1 architecture, improving maintainability, consistency, and system performance.
- Built a reusable and generic Query Builder framework that can be leveraged across multiple modules for advanced filtering and data retrieval.
- Revamped and modernized multiple UI screens, including code refactoring and component optimization to improve performance, scalability, and user experience.
- Designed and developed a centralized Notice Board module used across the platform to publish announcements, promotions, and organizational updates.
- Implemented engagement features within the Notice Board, including comments, acknowledgments, likes, and dislikes to improve user interaction and feedback collection.

Full Stack Developer - Roambee

Mar 2023 - Aug 2025

- During my journey at Roambee, I started working on the Integration Hub portal as the lead developer, and we developed it from scratch. In Integration Hub, we used React with TypeScript, and my role was to develop the UI. We also used our own custom UI library, which follows our style and is used internally only. I introduced new components and made modifications as per needed. After completing this project, I moved to the main portal, where I oversaw all UI aspects, including the backend.
 - For the upcoming new features, I was the lead developer on the frontend. Additionally, I was involved in the Single Sign- On (SSO) implementation, contributing as needed. In the backend, I introduced new APIs for the new features we implemented and also worked on Elasticsearch.
 - Involve in the end-to-end implementation of Ocean and Air Tracking modules, from design document analysis to full-stack development and deployment.
 - Integrated third-party vendor APIs for real-time shipment data, seamlessly incorporating tracking information into the internal system.
 - Built interactive dashboard components to visualize vessel and air shipment (AWB) tracking, enhancing operational transparency.
 - Utilized Google Maps API to display live pings and render both optimal and actual routes for ocean vessels and aircraft.
-

EDUCATION

Dhirubhai Ambani Institute of Information and Communication
Technology (DA-IICT)

2021-2023

CPI: 7.6 - (M.Sc (IT))

J. G. College of Computer Applications

2018-2021

CPI: 7.82 - (BCA)

PROJECTS

Transportation, Logistics, Supply Chain and Storage

- **Tech Stack:** Angular, React, Node.js, MySQL, Cassandra and Express.js
- Offers verifiably better supply chain visibility & intelligence on demand, for on-time, in-full, in-condition delivery of shipments and assets anywhere in the world.

AlpViraam

- **Tech Stack:** Next.js, Tailwind CSS, MongoDB
- I built this website based on the client's requirements to support her professional work.
- **Link:** <https://alpviraam.in/>

HealthAssist

- **Tech Stack:** Angular, Spring Boot and PostgreSQL
- Developed a web application that enables users to schedule doctor appointments.

ACHIEVEMENTS

- Oracle Java SE 8 Fundamentals - Cloud Edition (WDP only)
 - 30 Days of Google Cloud
-
